ANAS AL-NAJJAR

Information Systems & Field Data Operations Specialist

Damascus & Rural Damascus, Syria | +963 940 005 979 | anas0alnajjar@gmail.com | LinkedIn | Website | GitHub

PROFESSIONAL SUMMARY

Information Systems and Field Data Operations Specialist with 7+ years of experience across humanitarian operations, case management, information management, MEAL, and custom system development. Skilled in translating real workflows into practical information systems, KoBo/Python automation, validation processes, reporting tools, dashboards, and user training. Experienced in leading projects from requirements analysis through implementation, adoption, maintenance, and operational support, with a strong record in connectivity-constrained and locally deployed environments.

SELECTED IMPACT

- Designed, customized, locally deployed, and supported a Frappe/ERPNext case-management system covering 10,409 child records and approximately 40 case managers.
- Developed KoBoToolbox, Python, and PHP automation workflows used across approximately 3,000 historical records for synchronization, attachments, validation, PDF reporting, and notifications.
- Built reporting and training operations supported by historical Power BI monitoring across 1,811 cases, 1,706 families, 40 case managers, and 5 supervisors.
- Designed and developed a complete Arabic RTL legal practice management system from scratch for a real Egyptian client using PHP, SQL, HTML, CSS, and JavaScript.

CORE EXPERTISE

Information Systems Design | Workflow Analysis | ERPNext/Frappe | KoBoToolbox | Python/PHP Automation | Data Quality & Validation | Power BI & Reporting | Field Data Operations | User Training & Adoption | Local Deployment, Backups & Maintenance

PROFESSIONAL EXPERIENCE

Enumerator | **Terre des hommes Foundation** — **Aug 2025 - Present**

- Collect qualitative and quantitative field data through interviews, surveys, focus group discussions, and key-informant interviews, ensuring accurate digital submission.
- Apply confidentiality, safeguarding, and child-friendly approaches during engagement with children and participating families.
- Prepare daily field reports, document operational challenges, and support coordination and Complaint Feedback Response Mechanism activities.

Field Operations Department Manager (Part-time) | **Syrian Technocrats** — **Jan 2025 - Present**

- Lead field-operations support and work directly with project owners to refine early-stage initiatives into structured and actionable project concepts.
- Support project studies covering problem definition, target groups, solution design, operational scope, stakeholder roles, implementation plans, budgets, risks, and expected impact.
- Contributed to initiatives in smart agriculture, child health and social protection, and school-environment improvement; also serve as Vice Chair of the Board of Trustees and contribute to governance and strategic direction.

Information Manager | **Al-Nada Association - UNICEF Partnership** — **Aug 2024 - Feb 2025**

- Managed information workflows for cash-transfer and integrated social-protection activities, including data validation, reporting, and secure handling of operational records.
- Developed KoBo/Python automation, Power BI dashboards, structured case reports, and staff performance summaries to support management decisions.
- Coordinated data processes supporting approximately 40 case managers and strengthened documentation, feedback, and reporting consistency.

MEAL Officer | **Syrian Climate Pioneers (SCP)** — **Jul 2023 - Jun 2024**

- Designed monitoring and evaluation frameworks, indicators, data-collection tools, and project evaluation processes.
- Analyzed program data and produced decision-oriented reports and visual summaries for project teams.

PROFESSIONAL EXPERIENCE - CONTINUED

Information Manager (Voluntary) | **Charity Health Association - Al-Qutifa** **Oct 2021 - Feb 2024**

- Designed and customized a Frappe/ERPNext case-management information system covering child and household records, assessments, services, documents, reports, and dashboards.
- Configured permissions and validation rules, trained approximately 40 case managers, and provided maintenance, data-quality feedback, periodic backups, and archiving.
- Implemented a stable local deployment and resolved network and IP-conflict issues through a fixed server IP and organized device identifiers.

Case Manager | **Integrated Social Protection Project - UNICEF** **Feb 2019 - Feb 2024**

- Supported more than 100 children with disabilities through assessment, case planning, referrals, follow-up, and coordination with service providers.
- Facilitated training and awareness activities for families and contributed to structured case documentation and multidisciplinary coordination.

Independent Information Systems & Data Consultant | **Project-based** **Ongoing**

- Deliver workflow analysis, custom information systems, automation, data analysis, dashboards, and decision-support tools for humanitarian and private-sector use cases.
- Built a complete legal practice management system for an Egyptian client and developed multiple KoBo, Excel, PDF, Telegram, and reporting automations.

Additional Experience: Accountant - Charity Health Association, Al-Qutifa (2020-2021); Trainer - Syrian Positives Foundation (2020-2021); Activities Coordinator - Ataa Institute, Latakia (2018-2019).

SELECTED SYSTEMS & AUTOMATION PROJECTS

KoBo Data Automation Suite - *Field-data synchronization, validation, documentation, and reporting*

- Built incremental synchronization, attachment organization, case-level PDF generation, Excel change tracking, bulk validation updates, and role-based Telegram/email reporting.

Custom Legal Practice Management System - *Real client project - built from scratch*

- Developed an Arabic RTL platform for clients, lawyers, cases, court sessions, documents, tasks, payments, notifications, dashboards, and granular permissions.

Case Manager Reporting & Training Operations - *Training, automation, and operational visibility*

- Designed a three-day case-manager training program, automated individual case PDF reports and folder structures, and developed management summaries and Power BI dashboards.

EDUCATION

MSc in Computer Science | Syrian Virtual University | Ongoing
Master's in Economics & Project Management | Damascus University | 2024
BSc in Applied Engineering | Tishreen University | 2019

TECHNICAL SKILLS

Frappe Framework, ERPNext, KoBoToolbox, Python (Pandas, OpenPyXL, Requests, Pillow), PHP, SQL, MariaDB, PostgreSQL, Power BI, Advanced Excel, REST APIs, Telegram Bot API, HTML/CSS/JavaScript, Git/GitHub, PDF automation, local server deployment, backups and archiving.

SELECTED CERTIFICATIONS

- Google Project Management Professional Certificate - Google / Coursera, 2025
- Python for Data Science, AI & Development - IBM / Coursera, 2026
- Quality & Accountability in Humanitarian Work - DisasterReady, 2025
- Building a Better Response - Humanitarian Academy at Harvard, 2023
- Action to End Child Sexual Exploitation and Abuse - UNICEF / Agora, 2023
- Training of Trainers - IBCT / Edraak, 2020
